Dear Engineer,

Thank you for the opportunity to apply for the Internship role at your company. I found the challenge interesting and it paved way for me to start learning and code in Golang. I found Golang syntactically like C and Java. Maybe you can say that Golang is a child of C and Java. After reviewing the company, I really liked the culture and felt like I would fit right in. The learning experience will also help me groom my skillset. It also led me to study about Japanese culture which I find quite friendly and interesting.

(こんにちは!)

I am a quality-oriented college student (Bachelor of Science in Computer Science) currently attending Ghulam Ishaq Khan Institute. Throughout my academic career, I have been consistently praised as hard-working by my professors and peers. While working on academic and extracurricular projects, I have developed proven analytical, teamwork and problem-solving skills.

After reviewing my CV, I hope you will agree that I am the type of competent and competitive candidate you are looking for.

Thank you for your consideration, and I look forward to hearing from you soon.
